

Some members have expressed an interest in continuing activities relating to 2017 discussion topics:

- Engineering Ethics
- Diversity

2018 Discussion Groups are focusing on:

- Engineering Education
- Communicating with the Public
- Engineering and the Sustainable Development Goals

Questions:

- Should CAETS discussion topics lead to an output? (e.g. statement, report)
- Should discussion threads be captured and summarized for member access on the website?
- Should interest groups be pulled together around topics of ongoing interest for follow-on activities?
- What should be the discussion focus for CAETS 2019?
